

## SALVATION ARMY WILL APPEAL FOR FUNDS NEXT MONTH

Calls upon the Salvation Army for help in the solution of soldier rehabilitation problems have increased steadily since the end of the war in Europe and are still growing, according to Lieut-Col. William Dray, Toronto, head of the Salvation Army Rehabilitation Department.

The Department's help to solve the problems of veterans and of veterans' family groups, its carry on this work and also the work of nearly 50 cities social service and welfare centers. The Salvation Army's National House Front Appeal for \$1,000,000 starts in September.

We have now in Canada seven rehabilitation centres and in these life never has a dull moment with the problems, many of them urgent, that come to us," said Colonel Dray. "We started our work of helping in the assimilation of war brides by establishing in England Canadian Wives' Clubs where lectures and demonstrations of life in Canada are given.

"Nearly 40,000 war wives and almost as many children are being brought to Canada in the movement underway. Large numbers of these new families have nothing like a comfortable home to look forward to, so not all the coming to this new land are happy. New arrivals are invariably well-disposed. The Salvation Army across Canada is daily assisting with the problems presented by these new families.

"Individual soldiers who returned and are to return unattached also have problems outside the scope of the federal, provincial and municipal rehabilitation schemes, excellent as these schemes are, said The Salvation Army is helping in the solution of their problems."

## Mr. and Mrs. H. CARRECK MOVE TO THE PACIFIC COAST

Mr. and Mrs. Harry Carreck left on Tuesday morning for Duncan, B. C. where they will reside in future. Mr. Carreck, came to Gleichen from England in May 1909 and Mrs. Carreck four years later. They were married here. Three of their children, Sydney, Winnie and Jim live at Duncan and the fourth Mrs. Milligan at Clearwater, Man.

Harry was somewhat of a comedian and at a critical or dramatic time could be depended on break the spell and crowd for he could crowd exactly and a rooster. This was especially so in his younger days and he put it to good use to the discomfort of many. Here are a few of the scenes of the days of the silent picture opera, dances and vaudeville, in the old Gleichen Hall, long since destroyed by fire there was a gallery. Harry and the young men liked this gallery and always sat there. At a critical moment in a picture when everybody was on the verge of tears and the audience very quiet, he just simply had to crowd. The heads of the audience nodded back and forth while the swallowed the lump in their throats and then laughed outright. Harry would do the same thing when in the midst of a vaudeville act, or when a singer paused in his or her singing, or in the middle of a tense picture of a dramatic scene, he caused consternation among the actors making them grin and generally making the show a flop. Always, immediately after the crowd, B. Carreck, who operated the hall, would rush out of his ticket office angrily shouting "What? What? What? and helped to create more confusion.

At the height of the "crowing and what? what?" proclivities Gleichen was one night stung by a wasp on a vaudeville circuit. The shows were good but after playing three weeks the company decided to quit. Gleichen and what? was to much for them and got cold feet and quit. Gleichen decided had become the most critical one on the continent.

Yes, Harry all of us will certainly miss you and we wish you and Mrs. Carreck the best of luck in your new home by the seashore.

Before the war aircraft production was a minor industry in Canada, employing only about 1000 workers and producing about 40 airplanes a year. By 1944, the annual output had increased to 4,000 planes and more than 120,000 men and women were employed. By the end of May, 1945, a total of 15,905 aircraft had been produced.

## News Items of Local Interest

Mr. and Mrs. Erford have purchased H. Carreck's home and are busy preparing to occupy it.

Eddie Dew who has been overseas for sometime returned home last week. Gleichen boys are returning fast now.

Wm. Schmidt Jr. is the happiest man in town these days. His wife, whom he met and married in England, arrived in Gleichen Sunday morning. Wm. Schmidt is the second English war bride to come to Gleichen.

V-J Day in Gleichen was a very quiet day. A few fire crackers were set off but that was all. That night about midnight the smaller fire alarm let go and then there was some scurrying around by citizens looking for the blaze which could not be found. This false alarm was a blessing in disguise it was discovered that there was no air in the big cylinder to properly blow the fire alarm.

All men being discharged from the armed services are requested to see Wm. Rythian or any other member of the Legion regarding joining the organization.

All the local China boys spent two days in Calgary last week celebrating the defeat of Japan. They claim they had a swell time in the city and were looking to see such a large crowd of whites to help them celebrate. They admit there were too many people present and prevented them from properly doing the things they were given credit to do.

R. C. Clifford has returned from his holiday trip to the coast and judging by the smile he is wearing must have enjoyed himself.

Tom Brown, our popular hotel man, took his neck and head when he dived of the high spring board at the swimming pool the other day and struck the bottom of the pool. The pool was only about half full of water at the time. At almost the same moment Ron jumped another man from Standard jumped. It is said he had his head cut when he hit bottom.

Harvesting of wheat in parts of the district has begun.

The Indian sports day held on the flat at South Camp last week was a success and was well attended by both whites and Indians.

Believe it or not we saw a icicle over six inches long and about an inch in diameter. Monday morning. It was found under a leaky irrigation tap by Charlie Charter of the Gleichen Hotel. We have not heard of any garden stuff being frozen.

There has been so much bloodshed, and so much horror during the past few years that at times the idea of the brotherhood of man have been worn pretty thin. Canada, who has been playing a part in the war of which we can all be proud, is also concerned with the great human task of helping to relieve suffering. One of the agencies devoted to this end is UNRRA. We have been reading the monthly review of the activities of UNRRA, and some of the nothing words loitering about, no strings. Here's one. In Yugoslavia the people have been living with the present spectre of hunger. You are used, no doubt, to seeing a few grains of wheat lying about. A few grains out of hundreds of bushels are nothing words loitering about, no strings. But, when UNRRA is delivering supplies of wheat to Yugoslavia, they are not merely giving the grains as they escape from the sacks. In one district in Yugoslavia the distribution of canned meat and vegetables allowed each person a slightly more than one can. Some cats, therefore, had to be opened and their contents poured out on that, each person could have his or her exact allowance. If the scales wavered slightly over the mark, the weighing official took a spoon and removed one bean so that the scales showed the right amount to be given. And then all of a sudden, one day, perhaps, inclined to feel that there is a convenience in having two meatless days a week. If we get a mental picture of men and women awaiting up a few grains of wheat, and hovering anxiously over an official as he weighs their wheat, and the scales wobble, will register the exact amount, perhaps we won't be inclined to grumble.

Mr. and Mrs. R. M. Stalnack of Calgary spent the weekend in town visiting relatives.

Miss Francis Woods left on Sunday for Donalda to spend her holiday, visiting her sister-in-law Mrs. Woods.

Miss Razafel James returned to Calgary to resume her position on the staff of the Gleichen Hospital.

George Gooderham, Jr. has joined the staff of Shogrite Stores and he is an active young man customer do not have to wait very long when being served by him.

Mrs. C. Brown mother of the Blackfoot Hospital has returned to town after spending several weeks in Edmonton.

Mrs. Hugh James was a Calgary sister during the weekend.

Cpl. M. Dase spent the weekend in town visiting friends, she returned to Calgary Sunday night.

Mrs. J. Bell and daughter Florence of Calgary were in town for a few days visiting her mother, Mrs. J. House, at Old Sun School.

Mrs. B. Prowse and two daughters of Calgary were visitors at the home of Mr. and Mrs. F. Bennett for a few days.

George Middleton, aged 80 years, died at Everdine Home Sunday. He had been a resident at the home for the past five years coming from Medicine Hat. He was born in Ontario and lived in the province for 52 years and was a farmer by occupation. Funeral services were conducted Monday by Major A. F. Parkinson after which interment was made in Everdine cemetery.

Miss B. J. McQueen returned to Medicine Hat Monday morning to resume her duties in the hospital there. She had spent the past several weeks in town holidaying.

R. Hueter, wife and family left during the week end and spent about a week holidaying in Banff and vicinity.

Meanless Tuxedos and Fridas are expected to save one million pounds of meat a week in Canada.

Donations from private service clubs and organizations in Canada to the war effort totalled \$15,742.60 for the two years 1942 and 1943 alone.

At the request of the British government the Canadian Government of C. H. H. Fire Fighters was organized with a personnel of 423 men recruited from 107 municipalities. They arrived in the city of the Magdon before the end of 1942 and were posted to six stations in four centres. They fought fires caused by incendiary bombs and buildings and they were returned to Canada at the end of 1944.

## THE WORLD OF WHEAT

### BRITAIN—OUR FARMERS' LARGEST MARKET

Britain constitutes the largest market for our prairie farmers. Anything that happens in Britain, therefore and which affects Britain's wheat and imports will have a direct effect on the welfare of our farmers. I have studied carefully the avowed self policy of the new British Labour Socialist Government, and it seems to me that these tend much more towards "Self Sufficiency" than towards international trade. The British people depend for their very existence on greatly increasing their exports so that they can continue to purchase the large quantities of Canadian wheat and four livestock products and other materials which they must have in order to live. It is to be hoped therefore, that as the new British government assumes responsibility and obtains a clearer picture of Britain's real needs, they will discard some of their "self-sufficiency protectionist" ideas and will adopt the only possible means to all in aid Britain, and incidentally Canada, which is a greater freedom of trade managed more by free enterprise, and less by government controls and government monopolies. At all events what happens in Britain will be well worth our watching and studying, for our prairie farmers and their friends.

## "NEED NEW TRACTOR TIRES?"

## COME IN AND SEE THE GOODYEAR Sure-Grip

THE O-P-E-N C-E-N-T-R-E SELF-CLEANING TREAD OF THIS GREAT SURE-FOOTED TIRE MINIMIZES SLIPPAGE—SAVES TIME—SAVES FUEL

John Avison, conductor of some of the CBC's most popular programs from the west coast.

Over a world dyed dark with suffering breathes the deep sweet sigh of Peace; and countless hearts are lifted up in praise and unutterable Thanksgiving to Him who was our shield and our shelter when the earth did tremble --- which now is still.

May the sacrifice of young lives spent and sorrow endured commend us to Him who sustained a righteous cause that He may order the beginning, direct the progress and perfect the achievement of the work which Peace makes paramount today.

T. EATON & Co.

blond guy so he knew you'd stave under the sun. After tonight he'll figure Violet is through with you and that he's got her.

"Stanley's eyes blazed. 'I'll—'

A phone ring interrupted him. Joe picked it up. 'Hello, who is this?'

"Stanley Winsett."

Joe shot a sharp glance at Lenny. 'It's Stanley!'

"Stanley?"

Joe covered the mouthpiece. Yeah, sure he's got some interesting news.

"Let's hear it," Lenny said. "Drop down closer to the bed, Joe."

Joe did so. "Hello, this is Joe, Lenny's sick. I'll take the call."

"Fine." The voice came over loud enough for both to hear.

"I've your pal to forget about Violet, Joe. Tell her I said she's a slut."

Stanley's smug, laugh came over the wire. "Violet asked something about a wedding and a promise—"

## IN SIMPLE TERMS

What Atom Is Has Been Described By A Layman

There is a layman's description of the scientific terms which have been variously used in discussions of the atomic bomb which was dropped on Japan.

Atoms are the units of which all matter is made. There are 92 different kinds of these atoms, one for each of the 92 chemical elements.

These 92 elements range from hydrogen, lightest in weight, up to uranium which is the most massive. In between lie carbon, iron, gold, radium and all the other known substances in the universe.

Every one of these 92 different kinds of atoms is made of exactly the same kind of small particles. The only difference between one atom and another is in the number of particles. Hydrogen, for example, has three particles and uranium more than 100.

The particles are electrons, which are negative bits of electricity, protons, which are positive bits of electricity, and neutrons, which have no electrical charge. Protons and neutrons both are nearly 2,000 times heavier than electrons.

Every one of the 92 atoms is made in the same pattern. Each one has a nucleus like the sun with electrons circling around it. The earth's other planets circle the sun in the same way. An atom's sun is made up of protons and neutrons. The particles in each atom are held together by electrical attraction. These forces of attraction are relatively tremendous.

They are so great that it is almost impossible to damage an atom of any kind. Splitting or smashing an atom means an attempt to knock out some of its electrical, or non-electrical, particles. This splitting is done by directing rays of millions of volts in electrical energy against atoms as they travel.

The rays usually are made of some of the particles that compose an atom, that is either electrons, protons or neutrons. Sometimes X-rays will damage an atom.

Smashing an atom is a minuscule action when compared by human means. The best that has been done has been to knock a few of the particles out of an atom like chips chopped out of a tree.

Only one atom has ever been split. That atom is uranium 238. Uranium atoms when bombarded by fast moving neutrons break into two nearly equal parts.

When uranium splits in two, some of the electrical attraction that held it together is given off in the form of electrical voltage. That voltage is the heavy makes the present atomic bomb.

HEAVY EXPORTER

During the period of the European war Canada's status rose to second place among world exporters. With about four-fifths of its foreign trade consisting of wartime commodities—finished military and naval equipment—its domestic exports in 1944 increased more than 27½% in value.

A COUNTRY EDITOR LOOKS AT OUR CANADA

BY JIM GREENBLAT

Interesting news: At Empress, Alta., the Canadian Girls in Training have celebrated their 21st year of continuous organization, which they think is a record in Canada for any group.

The farm owned by Rutherford McIlhenny in Lake County, Ontario, has been in possession of the one family for 124 years, the site originally chosen out of primeval woods by the first settler.

By reporting the report of a beautiful wedding by the "roose" were apologized, the intention was to say the noes were pink.

Rattlesnakes are numerous in parts of Alberta this year, gradually working their way north from hanties along the Milk River; two Medicine Hat citizens were bitten while working in their garden recently.

British Columbia health director, H. Stewart & Welsh Ltd., will build a new pulp mill near Port Alberni, for a sulphate pulp to manufacture rayon.

Even better than a hole-in-the-wall was the fact that two Powell River, B.C., residents got perfect 29 hands in cribbage. High scores being one, while last July Sam Jackson was so favored.

Mrs. J. Bacon of Midland Ont., has an ambulant Christmas cactus which has started its third blossoming this year.

Another Jersey cow in the herd of J. P. Norris, Truro, N.S., wins honors for her junior 2-year-old record of 7,640 lbs. milk, 420 lbs. of fat in 305 days with an average test of 6.85%.

Her size is to be soon announced as a Superior Sire, first developed in the Martinis.

Henry Canham of Amabel Twp. in Ont., has nine acres of fall wheat over six feet tall.

Post-war expansion: Pembina Mountain Cattle Limited have completed installing new equipment for feeding and watering clay hills in the Morden district for the production of bonding clay used in steel and foundries.

The additions to this plant of 6,000 sq. ft. are to be soon announced as a Super Sire, first developed in the Martinis.

Henry Canham of Amabel Twp. in Ont., has nine acres of fall wheat over six feet tall.

Firestone

SAFETY PROVED ON THE SPEEDWAY AT 100 MILES PER HOUR!

Imagine the punishment these tires took in this grueling, torturing test of tire safety and endurance as Wilbur Shaw, the famous race driver, under supervision of the American Automobile Association, averaged 100.4 miles per hour for 500 miles on the Indianapolis Speedway—100,000 miles of ordinary driving. Not a single skid or blowout occurred in the entire 500 miles—at speeds up to 135 miles an hour—definite proof that Firestone Synthetic rubber tires will stand up to any demand you can make of them! Remember this fact when you buy new tires.

Remember this fact when you buy new tires.

Imagine the punishment these tires took in this grueling, torturing test of tire safety and endurance as Wilbur Shaw, the famous race driver, under supervision of the American Automobile Association, averaged 100.4 miles per hour for 500 miles on the Indianapolis Speedway—100,000 miles of ordinary driving. Not a single skid or blowout occurred in the entire 500 miles—at speeds up to 135 miles an hour—definite proof that Firestone Synthetic rubber tires will stand up to any demand you can make of them! Remember this fact when you buy new tires.

## OUR COMPLETE SHORT STORY—

Fire And Water

—By— SEYMOUR RICHIN

McClure Newspaper Syndicate

Joe found Lenny still in bed. It was four o'clock in the afternoon so it looked funny.

"What's the matter with you?" Lenny turned his head slowly, jerkily, and with considerable care. His face and neck were a bright, painful red. "I'm sick," he said.

"Don't be stupid, Lenny. You can't afford to be sick. Not now. You've got an important job tonight. Joe stared at Lenny's face and stepped deeply. "Hey, what?" He stepped closer and peered down. "You're burning up!"

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

"Burnin'." Lenny mumbled. "Pretty bad."

## THE ROAD AHEAD FOR SERVICE PEOPLE

A couple of weeks ago we put out list of terms which are used day after day by rehabilitation officials to describe what is being done for returning veterans. The definitions of these terms were as simple as we could make them. Several readers have written in asking that this series be continued so here goes.

### Vocational Training

Although many veterans will be able to get back on their feet in civil life with only the knowledge and skill they already possess many others will need refresher courses to renew skills which have become rusty. Others will need training for new trades and vocations. If the Veterans' Affairs officials decide that a veteran's establishment will be directly assisted by training, and the veteran himself is adapted for the proposed course, they will authorize training for him either in a school or "on the job". In the former case any fees are paid and he receives an appropriate maintenance grant under the Post Discharge Re-establishment Order. If training is "on the job" he is placed with a company working in the field he has chosen and training is carried on under contractual arrangement. In this case he is treated as a normal employee and receives a salary directly from the employer, but part of that salary is a grant from the government. As his knowledge and skill increases the employer pays a greater portion of his salary until his training is completed, at which time he becomes a full fledged employee. Training is usually limited to a year but can be extended if necessary.

### University Training

If the veteran interrupted his education to enlist or if university training will assist him to re-establish himself, such training may be authorized on the basis of a month in university for each month of service, providing of course that he can obtain admittance to university. In exceptional cases where the veteran shows outstanding ability an additional period may be authorized beyond the period covered by his service. All fees for such training are paid and an appropriate maintenance grant is authorized for himself and his dependents. Finally university training must be taken in Canada.

Return benefits are available to veterans who go into business or farming on their own account, during the initial period while they are awaiting returns from their enterprises. The grants are up to \$50 per month for a single person and up to \$70 for a man and his wife with allowances for dependents. It is really a living allowance to enable the veteran to support his family while waiting for crops to mature or a business to establish itself.

(If you have a problem drop a line to Wartime Information Board, Ottawa.)

### ST. ANDREW'S CHURCH

Sunday, August 26th.  
Evensong, 7.30 p.m.  
Rev. D. A. Ford, B.A., Incumbent.

Clubs and organizations planning welcome home celebrations for returning servicemen cannot claim so-called rationed foods. Much as the ration board sympathizes with welcome home receptions, it cannot afford to allot extra rations. Canada's ration system, based on supplies available and anticipated production, could not stand a decrease in present consumer rations. Organizers of such receptions must, therefore, use individual members' ration allowances if they serve refreshments involving rationed goods.

The Royal Canadian Air Force Benevolent Fund assisted 1,553 airmen or their dependents with \$61,044 in loans and \$10,814 in grants during the first six months of this year.

Canada's daily war production bill rose from \$1,600,000 in 1940 to a peak of \$9,000,000 in 1943. Since the beginning of 1945 it has averaged about \$5,000,000.

Second only to the United Kingdom Canada has been a principal source of mechanized transport for the armed forces of the British Commonwealth.

Canada's blood donor service began in 1940. By the end of 1944, 1,788,007 blood donations had been received.

The way may be near when a truce can be called to the war waged by every housewife on moths. The amazing new insecticide DDT has potent powers as a moth killer, according to a recent report of the United Kingdom Wool Industries' Research Association. The association's scientists have developed a technique for applying an oil solution of DDT

to wool during manufacture which makes it moth-proof for life, no matter how frequently the fabric is washed or cleaned. Research workers also report that by mixing a minute quantity of DDT with cleaning fluids, clothing already in use can be made nearly 100 percent moth-proof. The first limited supplies of DDT have been made available for civilian use in Canada and Canadian scientists, hard at work on research, predict a bright future for this newest insecticide.
